Reliance Jio Launches India's First VoLTE International Roaming

KDDI, Japan becomes first operator to avail Jio's VoLTE based international roaming services in India

Mumbai, 20th November 2018: Reliance Jio Infocomm Ltd. (Jio) announced today launch of VoLTE based inbound International roaming between India and Japan. With this Jio has become India's first 4G mobile operator to provide VoLTE based international roaming services in India whereby international roamers will be enjoying HD voice and LTE high speed Data.

Japan-based KDDI Corporation is the first international mobile service provider to avail of Jio's VoLTE calling and LTE data international roaming service which provides international travellers with access to high-speed data and voice services on Jio's all-IP, 4G-exclusive network.

"Reliance Jio is focused on delivering the best data and voice experience to all of India and those who visit India. We welcome KDDI customers to Jio as the first international VoLTE and HD roaming users in India," said Mark Yarkosky, Reliance Jio.

With this new arrangement, international travellers will be able to experience Jio's world-class all-IP network, which has been consistently rated as the fastest network in India by TRAI's MySpeed application over the last 20 months with an average download speed of 20.6 Mbps during September 2018. Jio is also consistently rated to have the widest LTE coverage in the country.

Jio continues its commitment for making available comprehensive and innovative offerings that have transformed data consumption in India, turning the country into the world's largest consumer of mobile data and has catapulted it to 9th largest mobile operator in the world with over 252 million subscribers within two years of launch.

About Reliance Jio Infocomm Limited:

Reliance Jio Infocomm Limited ("Jio"), a subsidiary of Reliance Industries Limited ("RIL"), has built a world-class all-IP data strong future proof network with latest 4G LTE technology. It is the only network conceived and born as a Mobile Video Network from the ground up and supporting Voice over LTE technology. It is future ready and can be easily upgraded to support even more data, as technologies advance on to 5G, 6G and beyond.
