**Reliance Industries Limited**

Reliance Industries Limited has begun discussions with brokers to determine the price at which it will sell its Rs 37,000 crore share buyback offer. The company said in a filing that the price at which the offer will be accepted will be determined based on the average price of its shares traded on the BSE and NSE in the 15 trading days ending on the last trading day of the offer period.

The offer will be open for shares that form part of the company’s shareholding structure on the last trading day of the offer period. The company plans to use the funds raised from the share buyback for repayment of debt.

**APLICALGUARD**

A company has launched a new product in India, the APLICALGUARD, which is designed to prevent the spread of COVID-19. The product is a portable device that can be used on public transport, in schools, and in hospitals. It works by emitting a disinfectant mist that kills the virus.

The company is investing heavily in research and development to improve the product and expand its distribution network. The product is currently available for 24 hours on a subscription basis and can be used by multiple users.

**Photo of the Day**

For those who missed it, here's a photo of the Day from our website. It shows a beautiful sunset over the city, with the silhouette of the iconic landmark in the background.

**Coronavirus Update**

The number of COVID-19 cases in the country has increased by 500,000 in the past week. The government has announced new restrictions to control the spread of the virus, including the closure of schools and限制 of large gatherings.

**TikTok Impact**

The TikTok ban has had a significant impact on the Indian market. The ban has led to a decline in the number of users and the company has lost significant revenue.

**Revolution in Agriculture**

A new technology has been developed that will revolutionize the agriculture sector. The technology allows farmers to monitor their crops in real-time and make informed decisions about planting and harvesting.

The technology has the potential to increase crop yields by up to 50% and reduce water usage by 30%. The government is planning to invest heavily in this technology to promote its adoption among farmers.

**Sports News**

The national cricket team has been training hard for their upcoming matches. The team is confident about their performance and is ready to face any challenge.

**Entertainment News**

A new movie has been released that has received mixed reviews. The movie is a sequel to a popular series and has been eagerly awaited by fans.

The movie is set against the backdrop of a war-torn country and follows the lives of two brothers who are forced to make difficult choices in the midst of conflict. The movie has been praised for its realistic portrayal of war and for its strong performances by the lead actors.
