Each one of us has aspirations and ambitions that drive us to be better and to achieve our goals. We envision a world that is cleaner, safer and sustainable for us and our loved ones. We dream of a future that is bright and filled with myriad possibilities. That future should not stay just a dream—let’s make it a reality.

Reliance is one of the largest polymer manufacturers in the world. Polymers are entering our lives in ever-growing instances: everything from toiletries to houseware, pouches to automotive parts, industrial to healthcare sectors use polymers. Our endeavour is to keep pushing the limits of what is possible with polymers and their applications. We believe this constant exploration of possibilities will lead to discoveries that will make our future richer and better.

Read on to discover how together, we are fulfilling aspirations, one dream at a time.
RELIANCE INDUSTRIES LIMITED

Reliance Industries Limited (RIL) is India’s largest private sector company on all major financial parameters. Its activities span various sectors like oil & gas, petroleum refining & marketing, petrochemicals (polymers, polyesters, chemicals, elastomers, fibre intermediates), textiles, organised retail, infotel and SEZs. RIL is India’s largest exporter and the first private sector company from India to feature in the Fortune Global 500 list of the ‘World’s Largest Corporations’. It ranks amongst the world’s top 200 companies in terms of profits.
RELIANCE POLYMERS

Reliance Polymers is at the forefront of the global polymer business, using state-of-the-art technology to set the highest standards in product and quality.

This has made us one of the largest producers of polymers with an annual production capacity of 4.4 MMT, operating world-scale plants for Polypropylene (PP), Polyethylene (PE) and Polyvinyl Chloride (PVC). We deliver a host of offerings to fulfill various needs: a wide range of grades in each product category provides opportunities for diverse applications across agriculture, automotive, building & construction, healthcare, infrastructure, lifestyle and packaging.

Superior technological strength, strong focus on R&D and the latest IT-enabled services that provide for efficient supply chain management and end-to-end solutions offered across the value chain, support our strong commitment towards our customers.

OUR VISION

Global leadership in polymers through innovations that usher in sustainable development
REPOL POLYPROPYLENE

If you can dream it, we can help convert your idea into a successful business with the ingenuity and versatility of our Repol Polypropylene (PP). Its cost-effective applications across various sectors provide solutions through innovation, customisation and material substitution.

As one of the top 5 manufacturers of Polypropylene in the world, Reliance Polymers offers a wide range of grades of
• Repol Homopolymer
• Repol Random Copolymer
• Repol Impact Copolymer

With an annual production capacity of 2.7 MMT, the scope for innovation and new applications is infinite. Repol Homopolymer grades are available in a wide range of melt flows and molecular weight distribution, and are used extensively in flexible applications for commodity and industrial packaging (TQPP/BOPP/ cast films and woven fabric). Special grades are also available for fibres and filaments, extrusion, blow moulding and injection moulding applications.

Repol Random Copolymers, with improved strength and excellent contact clarity, are available for plumbing pipes, sheets and blow moulding applications.

Repol Customised Impact Copolymers are available in a diverse range of impact strengths and melt flows to suit the needs of injection moulding, thermoforming, blow moulding, extrusion coating and compounding.

For more information, please email us at: pp_businessdevelopment@ril.com
Providing a wide range of Relene Polyethylene

RELENE POLYETHYLENE

Some of the most essential elements of life are also amongst the most fragile. Relene Polyethylene, with its variety of secure applications, ensures maximum protection to everything that matters.

With annual production capacity of 1.7 MMT, Reliance Polymers offers the entire range of Relene Polyethylene:
- High Density Polyethylene (HDPE)
- Linear Low Density Polyethylene (LLDPE)
- Low Density Polyethylene (LDPE)

Octene and Butene grades are used in specialty films and various packaging applications. We are one of the six producers of Octene grade in the world.

Relene HDPE is available in a wide range of densities like high-pressure pipes, telecom ducts, carrier bags, woven sacks, caps, closures, injections and blow moulded products.

Relene LLDPE finds extensive usage in milk and edible oil packaging, extrusion coating, lamination films, cast films, stretch films, specialty films, rotomoulding and injection moulding.

Relene LDPE finds usage in heavy-duty films, lamination films, extrusion coating and moulding applications.

REON POLYVINYL CHLORIDE

Every natural resource, like life itself, is invaluable. Protecting and conserving them is where our Reon PVC steps in, by being the ideal substitute for traditional materials used in agriculture, construction and healthcare.

Reliance Polymers is India’s largest manufacturer of suspension grade Polyvinyl Chloride, with an annual production capacity of 625 KT across a wide range of viscosities.

Typical applications for Reon PVC include rigid pipes and fittings, flexible tubes, hoses, doors, windows, partitions, floorwall coverings, wires, cables, electrical conduits and fittings, blood bags, tubing, heart catheters, IV fluid bags, toys, sports goods and footwear.

Our reach spreads across the globe in an endeavour to fulfill aspirations everywhere. We have over 185 marketing outlets in India, and a wide distribution network of overseas, regional and resident sales & marketing offices and warehouses. As a result, customers are always assured of quick and easy access to skilled technical and development personnel.

State-of-the-art business information systems implemented across all our plants and office locations, seamlessly integrate financial, material, sales and distribution functions. The latest IT-enabled services and CRM models support management of the polymer supply chain and ensure 24/7 connectivity to our customers.
We believe that our people make us who we are. Our leadership position in the field of polymers, is not only due to our vast knowledge base, deep understanding of the polymers business and markets, but also because of our outstanding people. A highly specialized and dedicated team comprising polymer technologists, engineers and sector specialists are working towards creating opportunities and providing solutions.

The Product Application and Research Centre at Mumbai is a centre of excellence that is committed to the development of new polymer grades/products and applications. PARC collaborates with several testing institutes, standard & specification agencies and with our world-class Polypropylene pilot plant, to make sure our products meet international standards.
CONSISTENT QUALITY AND SUSTAINABILITY

Exacting quality is at the centre of our activities at Reliance Polymers. Which is why, we have adopted Total Quality Management, Six Sigma and ISO standards. Our manufacturing plants adopt best global practices and constantly strive for consistent and superior quality.

A commitment to Safety, Health and Environmental Standards has fetched our products and processes many accreditations from national and international bodies. The ultimate aim is Total Customer Satisfaction. And a customer-focused approach ensures sustainable quality through automated systems, adoption of quality programmes and institutionalisation of benchmarks. Yet, the biggest testimonial for us is the infinite trust of our associates and customers.
PARTNERSHIP FROM ‘START’ TO ‘FINISH’ AND BEYOND

With our wide range of products, advanced research and technology facilities and intellectual capital, we have been continuously delivering value to our customers.

We believe in a 360 degree partnership culture – a customer-focused approach that ensures sustainable growth across the value chain. We provide solutions from ‘molecule to market place’, spanning ideation to market development, knowledge sharing, and testing to commercialisation.

Reliance Polymers offers end-to-end solutions across:

- Agriculture
- Automotive
- Building and Construction
- Healthcare
- Infrastructure
- Lifestyle
- Packaging
