2Q FY 2018-19
Financial Results

17 October 2018
This presentation contains forward-looking statements which may be identified by their use of words like “plans,” “expects,” “will,” “anticipates,” “believes,” “intends,” “projects,” “estimates” or other words of similar meaning. All statements that address expectations or projections about the future, including, but not limited to, statements about the strategy for growth, product development, market position, expenditures, and financial results, are forward-looking statements.

Forward-looking statements are based on certain assumptions and expectations of future events. The companies referred to in this presentation cannot guarantee that these assumptions and expectations are accurate or will be realized. The actual results, performance or achievements, could thus differ materially from those projected in any such forward-looking statements. These companies assume no responsibility to publicly amend, modify or revise any forward looking statements, on the basis of any subsequent developments, information or events, or otherwise.
Highlights for 2Q FY19

Energy & Materials businesses
- Refining EBITDA at ₹ 6,094 crore, GRM of $ 9.5/bbl
- Record Petrochemicals EBITDA at ₹ 9,477 crore, up 56.3% YoY
- Record petrochemicals production at 9.4 MMT
- Integrated development plan for KG D6 on track

Consumer businesses
- Record Retail Turnover at ₹ 32,436 crore, up 121% YoY
- Record Retail EBITDA of ₹ 1,392 crore, up 3x YoY
- Digital services EBITDA at ₹ 3,589 crore, up 1.5x YoY
- India’s largest wireless data subscriber base of 252.3 Mn
- 7.7 bn GB data traffic during 2Q FY19

Robust operating and financial performance

- Record Net profit of ₹ 9,516 crore, up 17.4%
- Highest ever quarterly EBITDA of ₹ 21,156 crore, up 23.2%
Consolidated Financial Results : 2Q FY19

YoY Revenue growth led by
- High oil price (+44.5% YoY)
- Higher volume in petrochemicals YoY (9.4 MMT vs. 7.9 MMT)
- Solid growth in Retail (+121%), Jio (+52%)

Robust segment EBITDA growth of 23% YoY
- Record petrochemical EBITDA of ₹ 9,477 crore
- GRM $ 9.5/bbl

Retail EBITDA up 3x YoY to ₹ 1,392 crore
- Jio EBITDA ₹ 3,589 crore, up 145% YoY

Capturing value of integration in Hydrocarbons, scaling up consumer touch-points

Record standalone net profit: ₹ 8,859 crore, up 7.2% YoY
Consolidated EBITDA: 2Q FY19 vs. 2QFY18

- Volume growth and uptick in polyester chain driving petrochemicals contribution
- Challenging markets for crude and light distillate products impacted refining segment
- Growing customer traction for Retail and Jio
  - 252.3 million Jio subscribers
  - 137 million footfall in Retail

Consumer businesses contribution at 23.5% of segment EBITDA
R & M Segment Performance

- GRM lower QoQ at $ 9.5 /bbl
  - High crude prices, soft gasoline, jet-kero cracks
  - Unplanned shutdown of FCCU
  - Weak AL-AH diff. QoQ $ 2.3/bbl vs $ 3.2/bbl
- Earnings were supported by
  - Higher crude throughput, stable middle distillate cracks
  - Favourable move in currency
  - Brent-Dubai diff. ($ 1.0/bbl vs $ 2.2/bbl)
- Premium over Singapore margins $ 3.4/bbl
- 2018 global demand growth tracking 1.3 mb/d
- 2Q FY19 India oil demand growth at 2.7% YoY
  - Gasoline 6.6%, Diesel 2.8%, ATF 9.7%, LPG 4.8%

Global macro and crude market environment weigh on segment performance

- Crude throughput of 17.7 MMT
- 1,343 retails outlets operational
  - YoY volume growth : 19% MS and 10% HSD
Petrochemicals Segment Performance

- Record EBITDA, up 56.3% YoY, 2.9% QoQ
- Strong polyester chain deltas on QoQ led by PX (+45%), PTA (+11%), POY (+13%)
  - Strong regional polyester demand with constrained intermediates supply
- Record production 9.4 MMT, aided by higher QoQ PX (+23.6%) and PTA (+4.4%) volumes
- EBITDA margins lower due to weak polymer margins with ramp-up of new US crackers and firm feedstock prices
- Commenced ethane cracking at Nagothane – further boosting feedstock competitiveness

Strong domestic demand environment in 2Q FY19
- Polymer demand up 7% YoY
- Polyester demand up 14% YoY
Production decline in India and US impacted EBITDA

Domestic production 15.3 BCFe, down 14.5% QoQ

- KG D6: Gas production 3.7 MMSCMD, Oil & condensate production 1,651 BOPD
- CBM production 0.94 MMSCMD
- Unit realization $ 6.56/Mcfe, up 3.4% QoQ
- MA field ceased production in September 2018

US shale production 21.2 BCFe, down 10.9% QoQ

- Unit realization $ 4.06/MCFe, up 0.2% QoQ with higher HH prices

KG D6 project update

- R-cluster: Top hole drilling for 4 wells completed
- Satellite cluster: All major orders committed
- MJ Development: Contracting process for major long lead items underway

KG D6 monetization plan on track
Retail Segment Performance

- Turnover at ₹ 32,436 crore, up 121% YoY, 25.3% QoQ
  - Revenue excl. Petro and Connectivity grew by 146.8% YoY
- EBITDA at ₹ 1,392 crore up 3x YoY, 15.4% QoQ
- Unprecedented reach across 5,800+ towns and cities
  - Number of stores 9,146; 19.5 Mn sq.ft of retail space
- Remarkable success during the Big Sale between 11-15th August period
  - Received over 10 million footfalls, up 30% YoY

TRENDS : crossed 500 store mark
- Now operates 509 Trends and Trends extension stores across 245 cities

Robust growth across formats; Record customer footfalls and transactions
### Digital Services Segment Performance

- Industry leading metrics underpinning scale & robustness
- 252.3 million subscribers
  - Gross adds of 41.7 million, net adds of 37 million
  - 7.7 bn GB data traffic; 11.0 GB/user/month; 72% of 4G data traffic
  - Voice consumption per sub at 761 minutes per month
  - 4.1 bn hours of Video consumption per month
- Robust EBITDA margins; industry leading ARPU of ₹ 132
- JioGigaFiber – strong response from customers across the country

*Gross Revenue is value of Services figures in Rs crore, unless otherwise stated
Note: Standalone figures

Expanding digital eco-system with strong customer engagement
Refining & Marketing
Performance Highlights

- Resilient performance - sustained $3.4/bbl premium over Singapore GRM
- Maximized mid-distillate yields to benefit from strong cracks
- Improved diesel recovery with modification to Vacuum unit
- ATF production optimized in view of negative regrade
- FCC Unit stabilized post force majeure in Aug’18
- Petro retail and bulk sales volume grew by 11% YoY
- “Gold Award” from Brandon Hall USA for improved efficiency at Retail Outlet Network
- FIPI Award for Digitalization initiatives in Oil and Gas Sector – Company of the Year – 2017

Resilient performance in challenging margin and operational environment
Business Environment

- Brent averaged $75.3/bbl in 2Q FY19 up 1.2% QoQ, 44.5% YoY
  - Brent-WTI and Brent-Dubai spread narrowed during the quarter
  - Production gains in Saudi Arabia, Russia, US, Iraq, Kuwait and UAE offset losses from Iran and Venezuela
- Global oil demand growth of 1.3 mb/d expected in 2018
  - Firm demand growth in non-OECD countries and US
  - Headwinds emerging from US-China trade tensions, currency depreciation in emerging markets and higher oil price
- High global refinery runs on lower planned outages
- Middle distillate cracks supported by low inventory at key trading hubs
- Gasoline cracks under pressure from lower refinery turnaround and ramp up of new capacity

**Healthy demand growth fostered by core sector performances**

Global Refining Margins Environment

Global Refining Margins

- Singapore GRMs marginally higher on QoQ basis
  - Strong fuel oil and LPG cracks offset weaker gasoline and jet fuel cracks
  - Stable gasoil and naphtha cracks supported margins
- Europe margins strengthened QoQ on the back of higher cracks across products except Jet Fuel
- US refining continues to enjoy good margins from well-supplied domestic crude markets

RIL’s GRM of $ 9.5/bbl, outperforming Singapore margin by $ 3.4/bbl

Source: Reuters, RIL
Regional Business Environment

**Middle Distillate Cracks**

- Gasoil cracks remain supported with lower inventory and firm demand
  - Steady Gasoil cracks despite lighter turnaround in Asia
  - Lower distillate inventory across regions amidst steady supply indicative of demand momentum
  - Exports from China moderated during the quarter
  - Jet/Kero cracks weakened and regrades turned negative with supply growth outpacing demand growth in 2QFY19

**Source:** Platts, Reuters
Regional Business Environment

**Light Distillate Cracks**

- **Gasoline cracks**
  - Gasoline cracks down $0.60/bbl QoQ
  - Well supplied market due to capacity additions and lower planned turnarounds
  - Steady demand growth in Asian economies and unplanned outages supported gasoline cracks in the region

- **Naphtha cracks**
  - Naphtha cracks remained flat QoQ
  - Increased supplies from higher refinery runs and new capacities absorbed by higher cracker runs

**Light turnarounds and capacity ramp ups offset impact of unplanned shutdowns**

Source: Platts, Reuters
Regional Business Environment

Fuel Oil and AL-AH diff

- Summer demand from Middle East restricted arbitrage volumes flowing in to Asia
  - Cracks also gained from lower inventory in Asia
- Towards the end of the quarter, cracks weakened with reducing Middle East summer demand

Crude differentials
- AL-AH spread narrowed QoQ
  - AH OSP gained from stronger fuel oil crack and lower production of heavy crude grades

Strength in fuel oil cracks impacting light-heavy differentials

Source: Platts, Reuters
Robust Domestic Fuel Demand Growth

Domestic Demand YoY

- India oil product demand grew 2.7% in 2Q FY19
  - Strong transportation fuel demand led by auto sales despite rise in fuel prices
  - LPG demand, for last 60 months in a row, continued to record a positive growth due to switch to cleaner cooking fuel

RIL refinery product sales YoY

- Increased petrochemical integration led to higher captive sales Y-o-Y
- Strong retail and bulk sales on back of strong demand for transport fuels

Indian oil demand continues to grow led by transportation fuel

Source: PPAC
Domestic Marketing – Retail

Retail Outlets
- YoY Volume growth: 8% in gasoil and 21% in gasoline
- 1,345 outlets maintaining highest per pump throughput in industry

Transconnect
- Highest ever volume under the loyalty program, representing 32% of HSD sales
  - 55% contribution of high volume customers
  - Strategic partnerships with financial agencies/ aggregators
- 164% YoY growth in HSD sales to mobile towers

Development
- Executing customized “state-specific” strategies for improving market share
- Roll out of Automated Price Engine - a major milestone for Dynamic Strategic Pricing

Building on strategic initiatives and technology for continuous volume growth
Domestic Marketing – Bulk and Other Businesses

- **Bulk HSD**
  - Volume growth of 13% YoY; Market share improved to 7.8%
  - Focus on into high potential State Transport Undertakings
  - Maintained priority position with railways; 22% growth in non-railway business

- **ATF**
  - Volume growth of 29% YoY; Market share improved to 4.8%
  - Aggressively growing presence through adding new AFS and leveraging hospitality model
  - Strengthened relationship with existing airline customers by fuelling at additional airports

- **LPG**
  - YoY Volume growth of 14% in Packed LPG and 58% in Propane
  - Initiated product sourcing through purchase from import parcels of third parties

Strengthening country-wide network presence for sustained market share growth
Strategic Advantage

**Responsiveness**
- Took advantage of market conditions by importing high octane components to add value to overall gasoline pool
- ATF production optimized in view of negative regrade

**Flexibility**
- Re-optimized crude slate taking advantage of arbitrage opportunities
- 2 new value additive US crudes added to the basket
- Maximized Middle Distillate production in view of stronger cracks

**Downstream Integration**
- Fully saturated PX capacity as PX market tightened by optimizing Platformer feed and reformate import
- Propane maximized in ROGC for higher value addition

Strategic advantages helping in sustaining competitive advantage
R&M Business Outlook

- Global oil demand growth expected at 1.3 mb/d in 2018 and 1.4 mb/d in 2019
- Refinery capacity addition estimated at 800 kb/d in 2018 and 1.5 mb/d in 2019
- Increasing risk of reduced Iranian exports and limited spare capacity to keep crude price elevated in near term
- Strong middle distillate demand growth expected on firm economic outlook, seasonal heating demands
- Growing gasoline supply with the ramp up of new refining capacity to keep cracks under pressure
- Light heavy crude differentials could widen with weakening of fuel oil cracks
- IMO specification change in 2020 to boost gasoil crack and lead to widening of gasoil – fuel oil spread

Global demand growth and IMO spec change to support margins over medium term

- Robust operations of ROGC complex and deep refinery integration underpin RIL’s cost leadership
  - YoY 2Q FY19 volume growth: PE (+86%), MEG (+92%)
- Completed Nagothane ethane pipeline projects:
  - Feedstock flexibility enabling operational and cost optimization with commencement of Ethane cracking
- Soft Polymer margins were more than offset by strong Polyester margins aided by healthy chain economics
  - 2Q FY19 QoQ: PX (+45%), PTA (+11%), POY (+13%)

Cost competitiveness maintained, leveraging feedstock flexibility and operational excellence
Business Environment 2Q FY19: Macro View

- Naphtha prices firmed up through 2Q, tracking strong crude and LPG prices
  - Naphtha up 3% QoQ and 46% YoY
- Start-up of new gas based crackers in US driving ethane demand and a firm price environment
  - Pipeline and fractionation capacity constraints aggravated a tight supply scenario
- Asian propylene prices strengthened amid lower availability from shutdowns
- Global polymer trade flow altering with escalated trade friction between China and US
  - Increased US volumes reaching South Asia, while Middle East supplies increasing into China
- Margins for integrated polyester players remained firm with healthy chain economics
- Policies to curb single use plastics encouraging the adoption of a circular economy framework
- Domestic demand growth continues to remain robust:
  - Polymer demand up 7% YoY, Polyester demand up 14% YoY

Source: RIL internal estimates
Cost curve steepened amidst elevated feedstock prices

Note: Crude prices are average of Dubai Crude for the quarter
Source: RIL internal estimates
Polymers
Healthy demand growth fostered by core sector performances

- 2Q FY19 domestic polymer demand up 7% YoY:
  - Boost in infrastructure and cement industry
  - Efficient supply chain post implementation of e-way bill driving virgin polymer consumption
  - Increasing disposable income and consumer confidence lifting packaging demand
  - Growth in automobile and appliances sectors
  - Enhanced focus on R&D and innovation
  - Polyolefin demand in China been stable amidst currency depreciation and moderate economy growth

![Bar chart showing Domestic Demand Growth (2Q FY19 Vs 2Q FY18)]
Polymers – Margins Soften Amidst Strong Feedstock Prices

- PP margins eroded with near 4-year high propylene prices with tight supply owing to key steam cracker shutdowns
- PE margins continued to soften with new capacities ramping up and strong feedstock price
- PVC margins also eased due to high EDC prices led by low caustic and high ethane prices

Source: Platts, ICIS
**Polymers – Operating Performance**

### RIL Production

</tr>
</tbody>
</table>

### Key Highlights

- RIL Polymer production up 19% YoY
  - State of art ROGC complex continues to aid volume growth
  - Production largely steady QoQ amidst FCCU shutdown in Jamnagar
- Domestic supply improvement restricting imports—RIL’s market share in domestic LDPE at 60%
- Continuous focus towards plant reliability and process automation resulting in optimized operations
- Leadership position in the domestic polymer market

Increased domestic availability of product is strengthening India’s self sufficiency in basic materials
Start up of two new 1.5 MMTPA crackers in US; two more expected in coming quarter

- Incremental PE capacity of ~3 MMTA; expected to cater to global demand growth led by EMs

Trade conflicts between US and China causing structural shifts in global polymer trade flow; increased US supplies expected to hit SE Asia

China polymer demand growth starting to moderate

- Stricter environmental regulations forcing consolidation of small-medium convertors

India polymer demand continues to remain healthy on the back of robust GDP growth

- Demand to be driven by packaging, automobile and agricultural film segments
- Industry adopting Extended Producer Responsibility (EPR) amidst environmental awareness

New capacities to be absorbed by a robust and growing global demand
Polyester Chain
Business Environment: Polyester Chain

- PX witnessed strongest margins in 6 years
  - Tight markets due to planned/unplanned shutdowns
  - Operational glitches at new capacities
- Tight markets and strong downstream demand supported PTA markets
  - Sector experienced highest margins since mid-2011
- MEG margin sustained above 5 year average despite high port inventories and cautious buying
- Polyester markets remained buoyant aided by strong feedstock; slowing towards quarter end
  - Strong Chinese consumer demand propped up through e-commerce boosted polyester demand
  - Govt. of India doubled import duty on fabrics to 20%
- PET markets slowed amidst seasonal lull with buyer resistance to high prices; margins above 5 year average
Sustained Recovery in Integrated Chain Margins Continues

- Firm crude supported overall sentiments along the polyester chain
- PX margins breached 6 year highs; QoQ growth +45%
- Strong downstream demand, buoyant futures market and healthy polyester operations bolstered PTA prices and margins
- Strong feedstock price environment aided polyester prices, however buying remained cautious towards quarter end

Polyester chain delta sustains above 5 year average on healthy chain fundamentals
Fiber Intermediates Delta Scenario

- Tight supplies and robust downstream demand bolstered PX prices and margins despite firm naphtha price
- Limited PTA supplies supported prices and improved margins
- MEG margins sustained above 5 year average despite firm energy values and high inventory levels

Source: Platts, ICIS
POY margin strengthened as stronger demand helped absorb higher feedstock costs

PSF margins squeezed amidst cautious downstream sales and rising feedstock costs

Seasonally weak PET demand coupled with rising cost impacted QoQ margins; but firmed up YoY

Source: Platts, ICIS
Fibre intermediates production surged 10% QoQ basis

- YoY production up 16% reflecting stabilization of new capacities

Polyester production stable QoQ, up 4% YoY

- PET production up 8% YoY

RIL continues to benefit from an upcycle in polyester chain
Domestic Demand Growth (2Q FY19 vs 2Q FY18)

- Polyester demand growth healthy by 14% YoY
- PFY markets healthy owing to stocking and new downstream applications
- PSF markets affected by cautious buying and global slowdown
- PET demand growth aided by improved downstream demand
- RIL continues to remain competitive on account of its scale, integration and efficient product mix

Polyester markets withstood price volatility with demand registering double digit growth
Business Outlook – Polyester Chain

- Planned maintenance in PX and PTA during 3Q FY19 likely to support markets
- Global polyester markets likely to remain cautious and influenced by feedstock trends
  - Seasonal Christmas and New Year demand in textile/beverage market in near term would be supportive
  - Evolving trade dynamics due to US-China trade friction needs monitoring
  - Global economic growth and weakening currency in emerging markets could impact demand
- Cotton to be supportive amidst tight markets and strong exports
- Indian textile market to witness healthy demand amidst strong economic growth and government support
  - Increased import duties on fabric and garments and reduction in duties on machinery imports

RIL continues to lead with innovative products and strategic downstream diversification

</tbody>
</table>

Note: RIL share of total domestic production at 15.3 BCFe

**KG D6**
- Average production of gas at 3.7 MMSCMD and oil and condensate at 1,651 BOPD
- MA field ceased production effective from 17th September 2018

**Panna Mukta**
- Average production of gas at 4.0 MMSCMD and oil at ~12,020 BOPD
- Lower production on natural decline and unplanned shut down for 13 days owing to Single Point Mooring (SPM) integrity issues

**CBM**
- Average production rate 0.94 MMSCMD
Project Updates

KGD6
- R-Cluster Development on track:
  - Top hole drilling for 4 wells stands completed. Drilling and lower completion operation of first well commenced
  - 1st campaign of installation of facilities scheduled to commence from 3Q FY 19
- Satellite Cluster - All major orders have been committed. Project related activities are targeted to commence by end of 3Q FY 19
- MJ Development - Contracting process for major long lead items including FPSO is underway

CBM
- Phase-II activities - Civil works for Gas gathering station, priority well locations and pipelines underway
Oil & Gas

Shale Gas
Dry Gas production at 83.9 Bcf/d, up 5.3 Bcf/d from June’18 avg.
- 2Q FY19 avg. HH Gas prices at $2.90/MMBtu, +3.5% QoQ
- Marcellus differentials to HH improved 7.0% QoQ at ($0.52)/MMBtu
- Exports to Mexico increased 16% QoQ and averaged ~5.0 Bcf/d
- LNG exports stable QoQ at 3.25 Bcf/d
- Gas in storage at 2,866 Bcf; 607 Bcf below 5 Year average
  - Inventory optics bullish, however, further production increases anticipated – Marcellus/Utica, Permian, GoM
- Low gas in storage/upcoming winter to drive near term HH prices
  - HH price spikes a possibility if winter turns out colder than normal
Price Environment: WTI, NGL and HH

**WTI / NGL**

- QoQ WTI average up ~$1.6/bbl at $69.5/bbl
- US production increasing, driven by Permian Basin expansion, but rate of growth has slowed due to infrastructure constraints
  - US oil production at 11.1 MMbbl/d up ~200 Kbpd QoQ
- Forward curve increased QoQ on back of Iranian sanctions
- NGL price up 18.9% QoQ at $33.2/bbl, on higher purity product prices
- Ethane demand outlook strong supported by increased demand from new crackers coming on-stream

**HH**

- Near term HH prices higher with strong demand and low inventory
- 2019 price highly dependent on upcoming winter
