

Mumbai, 10th March 2026

MEDIA STATEMENT

At a time when global energy markets are experiencing volatility, ensuring uninterrupted access to essential fuels for Indian households remains a national priority.

Reliance Industries is taking proactive steps and in line with the Government guidelines, to **maximize LPG production** from our refining and petrochemicals complexes at **Jamnagar — the world’s largest integrated refining hub**. Our teams are working around the clock to optimize refinery operations and enhance LPG output so that supplies to the domestic market remain stable and reliable.

At the same time, **natural gas produced from the KG-D6 Basin will be diverted to support supply to priority sectors**, in line with national energy priorities and Government guidelines.

For Reliance, India’s energy security and the well-being of millions of Indian families always come first. We will continue to **work closely with the Government of India and remain fully compliant with all national guidelines and allocation priorities**, ensuring that energy supplies reach the sectors and communities that need them the most.

As always, Reliance will stand firmly with the nation in its time of need. In times of global uncertainty, we remain committed to doing everything possible to support India’s energy security and ensure reliable access to essential fuels for the country.
